Re: Notice to Proceed with Construction of the Horsepower Replacement Project

Dear Mr. Carranza,

I approve your February 21, 2020 request for Tennessee Gas Pipeline Company, LLC (TGP) to begin construction activities for the Horsepower Replacement portion of the 261 Upgrade Project in Hampden County, Massachusetts.

This authorization is based on our review of TGP's Implementation Plan, filed February 21, 2020, which included the information necessary to meet all pre-construction conditions of the Federal Energy Regulatory Commission's December 19, 2019 *Order Issuing Certificate* (Order) and February 21, 2020 *Order Granting Partial Waiver of Condition* for the activities approved herein. In addition, we have confirmed the receipt of all federal authorizations relevant to the approved activities. I remind you that TGP must comply with all terms and conditions of the Order and that no other activities are authorized other than those identified. If you have any questions, please call Nina McDaniel, Environmental Project Manager, at (202) 502-8772.

Sincerely,

A. Eric Howard, Chief
Gas Branch 2
Division of Gas – Environment and
Engineering
